INDEX TO VOLUME 297

January–June 1974

SUBJECT INDEX

Papers are listed under subject headings with authors' names in parentheses following title of paper. Authors are listed with titles of their papers in alphabetical order in the Author Index. Entries with (BC) are Brief Communications.

A

An age dependent epidemic model (Hoppensteadt), 325

Averaging waveforms by Fournier analysis. Representative and synchronous averages (Auerbach), 169

Axially moving beam. Dynamics of an axially moving beam (Tabarrok), 201

B

Bioelectric source-field relationships. Formulation of . . . in terms of surface discontinuities (Plonsey), 317

Bloch–Grueneisen functions. Simple piecewise continuous approximations (Fuller), (BC) 293

Book Reviews

Ackroyd, M. H.: Digital filters, 297

Emch, G. G.: Algebraic methods in statistical mechanics and quantum field theory, 299

Fedoseev, V. A.: Advances in aerosol physics, 147

Hill, P. H.: The science of engineering design, 225

Johnson, R. C.: Mechanical design synthesis with optimization applications, 226

Johnson, W.: Impact strength of materials, 297

Kanwal, R. P.: Linear integral equations: theory and technique, 227

Siegel, R. and J. Howell.: Thermal radiation heat transfer, 150

Sporn, P.: The social organization of electric power supply in modern societies, 148

Taylor, D. E.: Linear circuit theory, 228

Weinberg, S.: Gravitation and cosmology, 147

Wooten, F.: Optical properties of solids, 148

C

Circular plate on multipoint supports (Williams), 429

Computer simulation. Electrocardiogram, heart activity (Thiry), 377

Control systems, saturating. Optimal and sub-optimal control, time-optimal control (Fuller), 7

D

Dielectric tensor. Dieletric tensor of a warm plasma in invariant form (Chen), (BC), 221

Differential geometry of heart valves (Peskin), 335

Discrete systems. Stability of a class of discrete systems (Sinha), 287

Dynamics of interacting populations, (Auslander), 345

E

Elasticity. Continuum mechanics, engineering mechanics (Ghosh), (BC) 75

Electroencephalography. Digital signal processing, digital filtering, spectrum and cepstrum analysis (Childers), 103

F

Filters, active RC. Design of RC-active networks using generalized-immitance converters (Bhattacharyya), 45

Fredholm integral equation. Initial value method for solving (Vemuri), 187

G

Graphs and digraphs. Communication problem (Harary), (BC) 491

H

Heat transfer. Extended surfaces, combined convection and radiation (Wilkins), 1

J

Jordan transformation. An algorithm for Jordan form transformation (Chen), 449

L

Lumped-distributed networks. Multi-variable circuits, realizability theory of networks (Bose), 497

M

Minimax predictors. Signals with a bonded kth derivative (Kelsey), 29

N

Nonlinear control systems. Stability analysis, characteristic equations having complex coefficients (Tsay), 179

P

Partial fraction expansion. Transfer function, matrix inversion (Uraz), 81

R

Random network. Stochastic process, randomly switched network (Korn), 153

S

Signal properties. Use of signal properties for signal representation (Parks), 229

Speed control. PWM controller, d.c. motor control (Verma), 89

T

Theoretical biology. Mathematical biology, chemotaxis (of bacteria), optimization (numerical algorithms for 0) (Bremermann), 397

Thermodynamics. Thermodynamics and dislocation mechanics (Kelly), 59

Time-optimal control systems. Norm constraints on state variables at intermediate times (Mizukami), 17

Transient dipole radiation. Dipole radiation in an absorbing uniaxial crystal (Besieris), 243

Turbulence theory. Functional calculus, mathematical physics (Testa), 127

U

Uncertainty principle, relationship to diffraction. Antenna gain, directionality, relationship to uncertainty, diffraction, beam speed and Rayleigh range (Kowel), 135

V

Viscoelastic arterial conduit. Model studies of pressure and flow pulses (Rockwell), 405

Viscous MFD. Low Hartmann flow in an annular gap, magnetic Prandtl number expansion (Matalon), 259
